Rubber Products

天津紐威特橡膠製品股份有限公司
TIANJIN NOVOTRACK RUBBER PRODUCTS CO.,LTD.

Tianjin Novotrack Rubber Products Co.,Ltd. Was set up in 2004 and the total investment is 20M RMB. manufacturing especially various kind sports floorings.

With more than 10 years of experiences, we have obtained great reputation for our brand. Novotrack brand prefabricated rubber track surfaces are made according to the IAAF standard regulations, using selected materials with the world advanced machinery and workmanship. Our products were tested by the German MPA lab officially appointed by the IAAF and approved that all of our specifications are in conformity with the standards published by IAAF. The IAAF product certification has been obtained. We are the cooperating partner of the Chinese Athletic Association to be the only supplier of prefabricated rubber track surfaces from the year of 2014 till 2017. We are certified by the CAA and awarded with the "Golden Track Surfaces". We are also qualified with the ISO-9001 and ISO18000. Our Novotrack surfaces have been laid successfully at the Shenyang Wulihe Olympic Sports Centre where the 12th National Game was held, Tianjin Olympic Sport Center where the 13th National Game was held and Shandong Jinan Olympic Sports Centre where the 11th National Game was held, Rongcheng Olympic Sports Centre and Weifang Sports Centre in Shandong, Beiyangyuan Sports Centre and stadiums in Tianjin where the National University Students Game was held, Xiangtan Sports Centre in Hunan, Jiangyin Sports Centre in Jiangsu, Yinchuan Helanshan Olympic Sports Centre in Ningxia and so on. All above mentioned stadiums have been certified by the Chinese Athletic Association as the Class I for competition. We have installed millions of square meters of our track surfaces at many city sports centres, university campus, high schools and primary schools tracking fields all over the country.

Novotrack has its sales center locating in Beijing, taking care of our sales of prefabricated track surfaces and contracting sports facility constructions. Most of our sales members are well experienced in this field and involved contracting the Olympic Game, National Game and Asian Game projects. We believe that the elite and professional sales team members will be more positive and management-skilled in the market and that will surely lead the Novotrack of national brand to a big success.

The spirit of our sales team is handling supreme projects with precise management control. Our aim is to get the recognition from our customers by supplying them with the standard facilities and further extended services. We would like to cooperate with all our friends and try to make us a comprehensive enterprise capable not only in manufacturing, selling, new products researching and developing, but projects consulting and programming as well as facilities installing and operating.

Products

The prefabricated rubber athletic track surfaces are globally recognized to be the replacement of the traditional PU(polyurethane) ones. The one-time embossing workmanship makes the perfect quality and advantage of strong wear-resistance, anti-slippery, shocking absorbent, excellent elasticity, anti-aging and long lasting durability. And further, they do not have the problems of the rubber granules coming off the surfaces. The surfaces could be recycled after its lifespan. They have passed the tests made by IAAF to be completely environment protected products. We are providing better and more comfortable sports surroundings for the players. The main material that we are using is natural rubber and the track surfaces are made into two layers. The upper layer is a bit harder than that of the lower and the waffle pattern forming 8400 concave air cushions per each square meter after it glued onto the asphalt basement, thus further enhancing its anti-slippery, elasticity and shocking absorbent, making less harms for the players.

Specifications	Size
Length	15 meter
Width	1.22 meter
Thickness	9 mm - 13 mm
Color: Please refer to the color card. Special color also negotiable.	

Products

We specially developed this court surfaces with lychee texture grains. The product is 9m thickness two layers and the bottom layer is waffle design which has better elasticity and bounce. The top wear-resisting layer further extends its durability. The multi purposes surfaces is suitable for all kinds of training courts. The product does not contain any poisonous heavy metal and chemical staff and it is up to the environment protection standard published by the state.

Products

NovoTrack Adhesive

The NovoTrack superme adhesive is a mixer of PU and Epoxy and specially used for laying the rubber track surfaces. The two parts adhesive solidifies quickly with stable chemical and weathering properties. It is ideal for sticking the rubber surfaces onto the asphalt basement and approved to be totally environment protected products by the Beijing HuaAn United Inspection and Certificate Centre appointed by the Chinese Athletic Association.

Professional Installation Team

NovoTrack has a well trained professional installation team which has 16 years of experiences for the stadium construction of Olympic Games and National Games. We could provide the most suitable project designing from the basement building till track laying and line marking in accordance with the requirements of every individual customer and field. The one-stop solution would guarantee the quality of the installation and our customer will have no difficulties like finding different teams to do the work dependently thus problems might happen between each period. We will train the customers to maintain scientifically the tracking fields and court after the completion of the project in order to help them to use it with longer lifedpan.

Promised after sale services

We consider our after sale services as further extension of our product quality. We have the quality guarantee of 8 years for the proper use of our NovoTrack surfaces installation. We could train the customer to maintain the tracking field scientifically after each completion of project. For our exports, we will provide our clients with full set of document instruction including maintenance. Also we could send our technicians to help our buyers to lay the surfaces and the buyer will pay the relative cost.
